

NAME

manual-rerouter – wrapper for *reroute*(8zm) transport agent program

SYNOPSIS

manual-rerouter

`[-c channel] [-h "hostname"] [-V]`

DESCRIPTION

The *manual-rerouter* is tool for ZMailer administrator for moving mails from the spool back to routing.

manual-rerouter wraps *reroute*(8zm) utility call with suitable parameters for generating input.

Suggested parameters for *reroute*(8zm) are:

-c channel

Message recipient selector "channel" (optional)

-h hostname

Message recipient selector "host" (optional)

-V

Print program version, and exit.

ENVIRONMENT VARIABLES

The *manual-rerouter* program inherits **ZCONFIG** environment variable, and reads it, and uses value of **MAILBIN** in it to locate the *reroute*(8zm) utility, as well as to determine where **POSTOFFICE**/transport/ directory is located at.

SEE ALSO

scheduler(8zm), *reroute*(8zm), *zmailer.conf*(5zm).
